THE INTERNATIONAL REVIEW OF SKI AREA MANAGEMENT
AND MOUNTAIN RESORT TECHNOLOGY

Winter Sports

TECHNOLOGY INTERNATIONAL
CELEBRATING TEN YEARS OF SUCCESS!

Winter Sports Technology International is the definitive International publication for ski resort design and technology. From access control, ski lifts, safety systems, and timing technologies to architecture, maintenance technologies, snow grooming and snow-making systems, Winter Sports Technology International features interviews with the industry's key figures, plus in-depth case studies on the latest venues and technologies.

frequency

- Winter Sports Technology International is published annually as a Showcase Review of all the latest technologies and systems available in the world's ski resorts. Benefitting from extensive distribution at the InterAlpin (Innsbruck), NSAA North America and Mountain Planet (Grenoble) exhibitions, the magazine is published in early April every year to arrive at these major International events. The magazine will also feature previews of these major events, highlighting some of the new technologies on show!

Winter Sports Technology International is also available in French/German according to the relevant European show!

content

- Content includes in-depth case studies that examine the latest technological breakthroughs; interviews with the owners of the world's most significant ski resorts; countries in focus; and news on latest industry trends and requirements.

INTERALPIN SPECIAL ISSUE

This issue will also
be available in German

As ski resorts evolve, designers are having to look beyond the winter season to provide guests with more than just well-groomed slopes

A significant investment in Australia's largest ski resort will improve lift access and boost snowmaking

circulation

80000

Winter Sports Technology International is circulated globally to a hand built circulation of over 8,000 key decision makers and specifiers within all of the world's ski resorts. Winter Sports Technology International is sent to named individuals and each and every copy has been either individually requested or company requested. Global circulation is split 50% Europe, 30% North America, and 20% rest of the world.

publishing schedule

THE 2019 ANNUAL SHOWCASE EDITION OF WINTER SPORTS TECHNOLOGY INTERNATIONAL will cover major features on all aspects of ski resort design and development including the following:

Snowmaking, Groomers and snow distribution, Architecture and design, Lift and cable car systems, Safety and avalanche protection, Summer activities, Slope maintenance/marketing, Weather systems, Ticketing and access control, Timing systems, Sustainability and green initiatives

PLUS! Major previews of InterAlpin, Innsbruck and the NSAA National Convention, San Diego, CA.
